

Leave Satellite Radio alone! Leave our First Amendment Rights Alone! The local XM Instant Traffic & Weather channels are as important as the News. How ironic, local traffic and weather can ultimately become the news and thus provide for me the information I need to remain diligent while driving, and this is what our government wants to remove? Why not some of the other "trash" they are so proud to transmit and then point to the First Amendment? The fact that NAB is putting the pressure on Congress and the FCC shows satellite radio is doing something right!
